

Smith Valley Rd and Madison Ave Roundabout

NEWSLETTER VOLUME 1: JANUARY 2018

PROJECT OVERVIEW

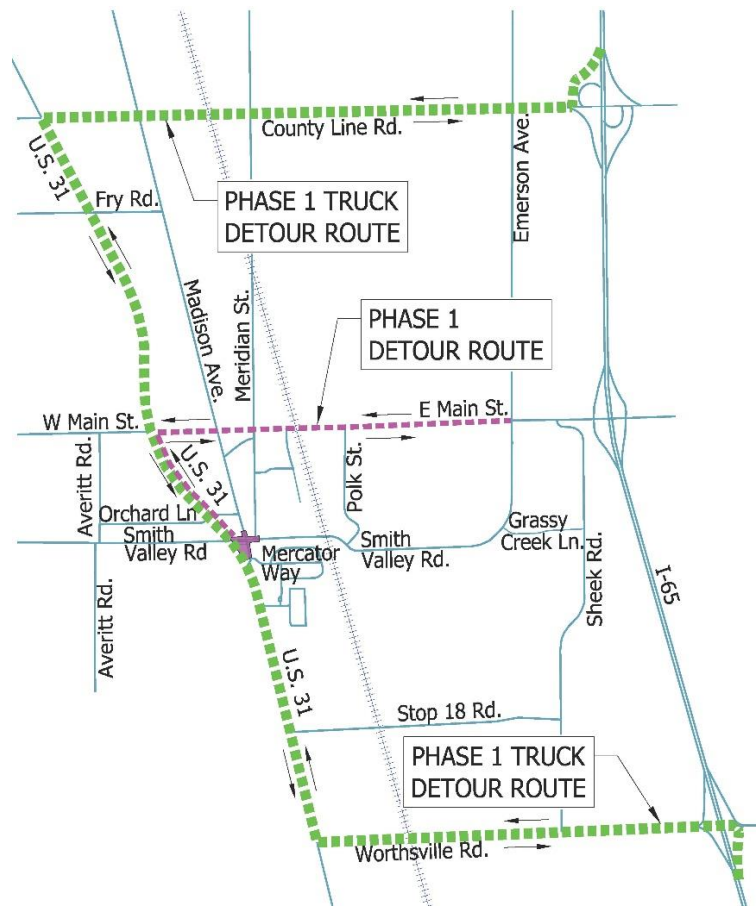

The project includes a total reconstruct of the intersection at Smith Valley Road and Madison Avenue with a new modified double lane roundabout to be constructed at the intersection, and it will include an added “jug-handle” ramp for eastbound traffic on Smith Valley Rd wanting to go northbound onto US 31. In addition, Madison Avenue will also be reconstructed from Smith Valley Road to US 31 and the intersection of Meridian Street and Smith Valley Road will also be reconstructed. Other improvements with this project include new concrete sidewalks and asphalt paths, new storm sewers to improve drainage, trees, decorative street lighting, improved pedestrian facilities at street crossings, signal improvements, and a decorative wall and pylon in the center of the roundabout. Access to businesses will be maintained throughout the project and detours should be followed to access them. Emergency Response, Mail/Parcel Delivery, and Trash Collection will be maintained for businesses during the project. Local Emergency Responders are aware of the upcoming project and will adjust routes accordingly.

PROJECT SCHEDULE

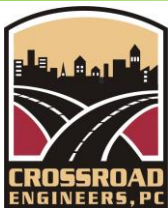

This project will be constructed in 2 phases to minimize closure time in the intersections. For Phase 1, the intersection of Smith Valley Road and Madison Avenue is scheduled to be closed on Friday June 1, 2018. The intersection will be

closed for approximately 90 days to complete the construction of the roundabout. After the completion of Phase 1, Phase 2 will involve a 30 day closure of Meridian Street at Smith Valley Rd, as well as other incidental construction on Mercator Drive and Smith Valley Road west of US 31 with these last 2 areas being constructed while maintaining traffic. Landscaping including perennials and trees will be completed by Fall of 2018.
